8. Indu's pencil is 15cm long. Jyoti's pencil is 8 cm long. Whose pencil is longer? How much longer?

Ans. Indu's pencil = 15 cm

Jyoti's pencil = 8 cm

Pencil is longer = $15 \text{ cm} - 8 \text{ cm} = 7 \text{ cm}$

Indu's pencil is longer by 7 cm.

9. Ask your Papa or Mummy

Price of 1 kilo salt –

Price of 1 kilo sugar –

Which one is more costly?

How much more does it cost?

Ans. Price of 1 kilo salt Rs. 10

Price of 1 kilo sugar Rs. 22

= Rs. $(22 - 10) = \text{Rs. } 12$

Thus, sugar cost more than salt by Rs. 12.

10. Ajay cooked chapatis in 25 minutes. Then he made dal in 15 minutes. How much time did he take to cook both things?

11. Chanchal sells school sweaters. In 2 days she sold some red, blue and coloured sweaters.

Sweaters sold on first day

Sweaters sold on second day

Red	Blue	Grey
38	66	74
40	23	89

Look at the above and answer the following questions:

(a) How many grey sweaters did Chanchal sell in 2 days.

Ans. (a) Grey sweaters sold in 2 days = $74 + 89 = 163$.

(b) Did she sell more red sweaters than blue sweaters in 2 day?

Ans.(b) Red sweaters sold in 2 days = $38 + 40 = 78$

Blue sweaters sold in 2 days = $66 + 23 = 89$

Therefore, Chanchal did not sell more red sweaters than blue sweaters (as 78 is less than 89).

(c) How many red and grey sweaters did she sell on the first day – more than 120 or less than 120?

Ans. (c) Number of red and grey sweaters sold in first day= $38 + 74 = 112$

Clearly, 112 is less than 120

Less than 120

(d) How many sweaters in all did she sell on the second day – more than 140 or less than

140?

Ans. (d) Number of sweaters sold on the second day = $40 + 23 + 89 = 152$

Clearly, 152 is more than 140.
